“ManagedMethods is easy to use and easy to do business with. This alone brings down the Total Cost of Ownership—the fact that it is affordable for school districts made our purchase decision easier. We thought it was a great product from the start and as we’ve used it over the years, we continue to see value in our decision.”

Vince Humes

**Director of Innovative Technology Solutions
Northwest Tri-County IU5, PA**

“ManagedMethods caught a dozen phishing attempts and disabled a couple of accounts that had logged in from overseas just this morning. I’m grateful that I have ManagedMethods to catch and remediate these attacks quickly. There’s no way our small team could stay on top of it all while also supporting our students, faculty, and staff.”

Stephen Gauss

**Systems Engineer
Gadsden County Public Schools, FL**

About ManagedMethods

ManagedMethods is the leading Google Workspace and Microsoft 365 cybersecurity, student safety, and compliance platform for K-12 school districts. The platform monitors district G Suite and Microsoft 365 email, file sharing, chat, and video apps 24/7/365 and empowers district IT admins with full visibility and control of their cloud environment.
