Managed Methods

Schools Using Google Need a Lesson in Cloud Security

Google Dominates Schools

Between the fall of 2012 and now, Google went from an interesting possibility to the dominant way that schools teach students to find information, create documents and turn them in.

But There Are Risks to Using Google

Along with the obvious benefits of Google come serious security risks, including malware, unauthorized 3rd party apps, objectionable content and more.

WARNING!

CASB

Defend Your School Against These Risks

To protect students and staff against these threats, many schools are using Cloud Access Security Broker (CASB) solutions to provide visibility into Google and Gmail data.

G Suite

ManagedMethods Makes Cloud Security for Schools Easy

Our cloud security tool deploys in minutes giving you visibility and control of all the data in Google and Gmail. Your entire district can be protected at an affordable price with no impact on users or existing networks.
