Cloud-Native Cybersecurity & Safety for K-12 Schools
API Data Sheet

Google Workspace & Microsoft 365 Monitoring No Proxies, Agents, or Gateways

School districts using Google Workspace and Microsoft 365 for email, file sharing, and data storage need to advance beyond perimeter-based security. Firewalls, MTAs, and web filters on the network are not capable of providing the visibility and control required to secure data and monitor student safety in the cloud.

If your schools are using Google Workspace or Microsoft 365 without a cloud-native monitoring tool you're vulnerable to cyber attacks and compliance gaps.

User Data Never Leaves Your District's Domain Fast Implementation. Easy to Use.

Benefits

- Fast implementation, easy-to-use, lightweight architecture
- Gain compliance visibility and control in Google Workspace, Microsoft 365, and in the browser
- Cloud-based compliance, safety, and security on any device, from any location
- Out-of-the-box and customizable audits & reporting
- Detect violent, sexual, discriminatory, and other harmful content in text and images in email, shared files, social media, and more
- Top-rated customer tech support

Threat Protection
Detect phishing & malware attacks in Google Workspace & Microsoft 365 email & drives

Data Security
Data loss prevention for sensitive student, staff & district data in Google Workspace & Microsoft 365

Monitor & Audit
Automated security & behavior monitoring & remediation 24/7/365 with simple reporting

Web Filtering
Automated security & behavior monitoring & remediation 24/7/365 with simple reporting

Classroom Management
Automated security & behavior monitoring & remediation 24/7/365 with simple reporting
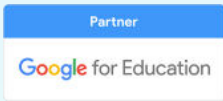

Student Safety
AI-enabled self-harm, suicide, cyberbullying, violence & explicit content detection

Monitor   Alert   Respond

"You don't know what you don't know. **Unless you have the budget to hire somebody to monitor your environment 24/7, you need solutions like Cloud Monitor and Content Filter** by ManagedMethods to help you do it."

Manuel Sanchez, Director of Technology
Azusa Unified School District

+

Cloud Monitor

Google Workspace & Microsoft 365 cybersecurity and student safety made easy and affordable. Through automated controls, this central command center helps prevent data security breaches, account takeovers, ransomware, and phishing attacks, while also detecting student safety signals.

Problems Cloud Monitor Solves:

+ Control Third-Party Apps
+ Data Loss Prevention
+ Phishing & Malware Threat Protection
+ Prevent Account Takeovers
+ Student Safety Signals

Content Filter

A modern, minimalist take on the web content filter. It uses browser-level URL blocking and artificial intelligence to provide affordable student safety, security, and CIPA compliance for K-12 schools. Content Filter is easy-to-use, scalable, and doesn't impact end users' browsing speeds.

Problems Content Filter Solves:

+ Easy Block & Allowlist Policies
+ Customize Policies by OU
+ YouTube & Social Media Blocking
+ Student Safety Signals AI
+ Identify Lost or Stolen Devices
