Google Workspace Administration Made Easy

Cloud Admin Product Data Sheet

31

Manage Users

Create, move, suspend, reset, and update user accounts individually or in bulk.

Restructure OUs

Create, rename, and move organizational units with fewer steps and less manual work.

Manage Chromebooks

Move devices between OUs, reboot, disable, deprovision, powerwash, and more at scale.

Security Audit

Scan your Google Workspace environment to surface configuration and account hygiene issues.

Automate time-consuming tasks, reduce reliance on GAM and custom scripts, and give your team more time for higher-priority work.

Audit

Find configuration and account hygiene issues that need attention

Automate

Complete bulk and repetitive Google Workspace admin tasks faster

Act

User, OU, Group, device, Vault, and data-transfer changes in fewer steps

Built To Make Your Day A Little Easier

Cloud Admin was built around the day-to-day Google Workspace administration challenges K-12 IT teams told us were taking too much time.

Cloud Admin Free For 30 Days

Simplify the Google Admin Work That Eats Up Your Day

Cloud Admin gives you an easy way to manage common Google Workspace administration tasks.

Manage users, groups, organizational units, Chromebooks, Vault workflows, calendars, Classrooms, data transfers, and more without spending hours navigating native tools or maintaining custom scripts.

Common Tasks Cloud Admin Simplifies:

- + Manage Chromebooks
- + Restructure Organizational Units
- + Bulk Manage Users
- + Simplify Google Vault
- + Transfer User Data

Real-Time Access to Your Google Workspace Data

Cloud Admin retrieves information directly from Google APIs in real time rather than caching your district's Google Workspace data. Authorized access is tied to your Google Workspace Super Admin account and must be renewed after it expires.

Audit. Prioritize. Take action.

Bulk User Administration

Create, move, suspend, unsuspend, reset, and delete users individually or in bulk.

Chrome Device Management

Manage devices at scale with bulk OU moves, reboot, disable, deprovision, powerwash, and more.

Google Vault Workflows

Search Gmail and Drive, manage matters and holds, and streamline exports to Google Drive.

Security Audit

Surface configuration and account hygiene issues such as inactive users and password risks.

Less GAM. Fewer Scripts.

Complete common Google Workspace admin tasks through an intuitive interface instead of custom commands.
