Cloud Monitor

Google Workspace & Microsoft 365 Security for K-12 Schools

Secure District Data & Monitor Student Safety Signals

School districts are on the leading edge of adopting cloud productivity in Google Workspace for Education and Microsoft 365. Unfortunately, district IT teams are not on the leading edge of cloud security. K-12 IT security is notoriously understaffed, underfunded, and undertrained.

Cloud Monitor provides a centralized command center for managing Google Workspace and Microsoft 365 cybersecurity and student safety risks.

The platform uses deep API integrations to monitor for these risks in district Google Workspace and Microsoft 365 24/7/365. It provides automated controls to prevent data security breaches, account takeovers, ransomware and phishing attacks, and detect student safety signals.

- **Google Cloud Platform (GCP) Infrastructure**
  GCP ensures the highest level of infrastructure security, stability, and scalability

- **Deep API Integrations**
  Cloud Monitor gets its data from published Google Workspace and Microsoft 365 APIs, creating zero impact on performance or footprint on devices

- **Zero-Day Threat Protection**
  Artificial Intelligence-based phishing and malware scanning detects malicious patterns in both known and unknown threats

- **Shadow OAuth Risk Profiling**
  Easily detect and revoke 3rd party apps connected to your district's environment with risky access levels

- **Easy to Deploy, Easy to Use**
  API architecture means Cloud Monitor can be deployed in minutes without extensions, proxies, or agents and does not require extensive training

Data Security

Data loss prevention for sensitive student, staff, & district data stored in Google Workspace & Microsoft 365

Threat Protection

Stop phishing & malware attacks in Google Workspace & Microsoft 365 email & drives

Monitor & Audit

Automated security & behavior monitoring & remediation 24/7/365 with simple reporting

Safety Signals

Detect self-harm, cyberbullying, abuse, discrimination & explicit content signals

Committed to Student Data Security & Privacy

Cloud Monitor does not store or access your staff and student data except when authorized by you in the context of a support ticket. All support access is logged and tracked.

The entire ManagedMethods support team is background checked.

Data Security & Compliance

- Discover and act on suspicious logins from unapproved locations

- Discover personally identifiable information, credit cards and other financial information being shared with outside the organization

- Detect and act on emails with phishing links

- Revoke excessive sharing of confidential information outside of the district

- Remove risky 3rd party apps with access to organizational emails and data

Cyber Safety Signals

- Discover student self-harm behavior in emails, documents, and images

- Identify text that may be indicative of bullying, racism, violence, and other troublesome behavior

- Assign roles-based notifications of student behavior risks to school principals and psychologists for intervention

Securing Over 1,000,000 Accounts in K-12

"Do not underestimate the cloud security risks facing you. Cloud Monitor is a cost-effective way to add additional layers to your data protection plans. Look around at all the products, and then implement Cloud Monitor."

Vince Humes
Director of Innovative Technology Solutions
Northwest Tri-County Intermediate Unit, PA

"The student safety component of Cloud Monitor paid for itself within a few weeks. We had a couple of incidents that we would not have caught had it not been for Cloud Monitor. It's effective and within a few clicks I can see exactly what's happening across my Google infrastructure."

Neal Richardson
Director of Technology
Hillsboro-Deering School District, NH
