Identify cyberbullying & threats of violence on social media			●
Anonymous student tip line			●
Message & file archiving for litigation holds			●
Professional safety team to analyze & report alerts (Gaggle & Securly only)			●

Customer Success Story
Bremerton School District | Seattle, WA

Bremerton School District's security team was already using Gaggle to help them manage campus safety. But Steve Bartlett, Technology Director at Bremerton, needed to secure the district's sensitive data stored in G Suite.

Government regulations mandate that schools have systems in place to ensure that sensitive data is not being stored or shared in a way that violates privacy policies. When Bremerton moved to G Suite for Education, the IT team quickly realized that Google's native monitoring and control features were not adequate. They needed to be alerted to potential cyber attacks and accidental data leaks.

Solution

Bremerton School District chose ManagedMethods because it's effective, deploys in minutes, doesn't require special training, has no impact on users, and is affordable.

> "The addition of ManagedMethods to our IT infrastructure allows me and my team to feel confident about protecting our students and staff when using Google G Suite. The dashboard and alerts provide me real-time info so that I can take immediate action to thwart any threats."
>
> *Steve Bartlett, Technology Director*

ManagedMethods offers both out-of-the-box and customizable monitoring features to cover security and compliance requirements. It works well with Gaggle to provide an additional layer of cyberbullying and inappropriate content monitoring, and allows the district to quarantine content that violates policies. Bartlett and his team also gained the ability to easily detect account risks and stop cyber threats before they can compromise student and staff identity.

Benefits

- Cloud application visibility without agents, proxies, or gateways
- Comprehensive email security for Gmail and Outlook 365
- Discovery and control of 3rd party apps that connect to Google or Microsoft 365
- Protection against malware, phishing, and other cyber attacks
- Policy enforcement to meet FERPA, COPPA, CIPA, etc
- Affordable pricing for districts of all sizes
